

LUSTROUS Creeping Red Fescue is an exceptionally shade tolerant, low growing, fine textured turf with a dark green color. An excellent choice for home lawns, parks, landscape areas, athletic fields, golf courses and playgrounds, **LUSTROUS** thrives as a permanent turf in areas where cool season grasses are adapted.

Advantages of Lustrous:

- **LUSTROUS** has an excellent tolerance to heavily shaded areas.
- **LUSTROUS** tolerates high summer temperatures & humidity well due to the origin of parental clones
- **LUSTROUS** creates excellent permanent turf that thrives in shady, cool and damp areas.
- **LUSTROUS** can be used alone or as part of a mixture.
- On athletic fields and playgrounds, **LUSTROUS** has improved traffic tolerance so it is recommended in mixtures with other cool season turf grasses for denser fuller turf.

Seeding Rates:

- Used alone, **LUSTROUS** requires a seeding rate of 5 lbs. per M square feet.
- When used as part of a blend, the required rate is 3 lbs. per M square feet.
- Germination begins in approximately 6 to 10 days.

Cutting Heights:

Recommendations vary according to location and season.

- Under good conditions, the first mowing should be required in 21 days.
- Limited use is recommended for the first 30 days after seeding.

LUSTROUS responds to 1 lb. Nitrogen per 1000 sq. ft. per growing month.

- Repeat applications only as grass shows need by fading color.
- Apply from 4 up to 6 lbs. N per 1000 sq. ft. maximum per year.
